

# The Great and Dangerous World of Sharks - Nico Cook

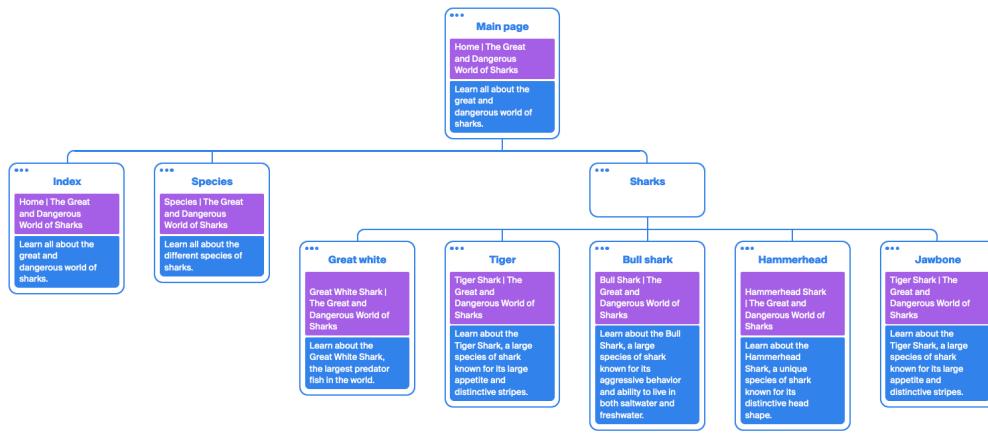

You will find the static location of the website at /index.html, which can be presented in all web-standard browsers. This page is used to provide information surrounding sharks and the various famous species that we find here on Earth. You will be able to easily navigate the site through the navigation panels at the top and bottom of every page (navbar / footer), and additional external links are used to allow for a greater extent of knowledge.

You should expect to see images, factual information provided through layout formats like lists and tables, and general knowledge supplied through paragraphed text, backed by external media and content.

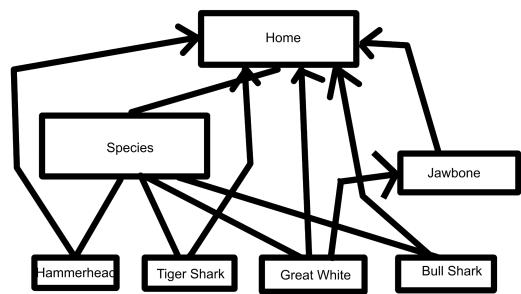

You can find a sitemap, along with other question answer references below.

## Task 9

### Sitemap

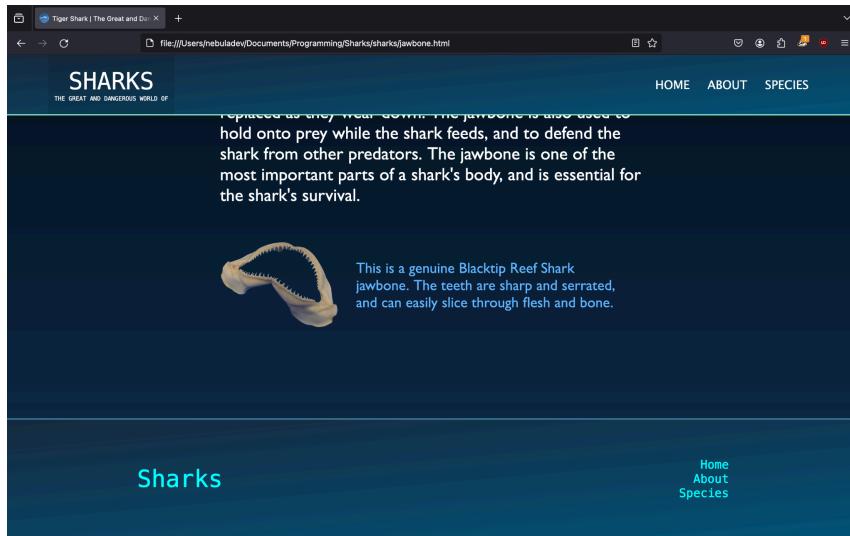

'Index' is just the main page, but referenced directly as '/index.html' rather than just '/'. Essentially:

## Task 10

Jawbone being used:

Anatomy model being used:

## Task 11

### Responsive design over multiple devices

The images supplied in Task 14's Web Browser Usage data provide the viewing of the webpage across two devices, but an additional device was used externally.

- Macbook Pro 2015 / macOS 14
- HP AIO / Windows 10
- Corsair Desktop PC / Windows 10

## Task 14

### User Feedback Form

- Design

The website utilises a clean and simple design, with a nice blue color scheme. I would suggest making certain pages brighter, especially the shark information pages (black gradient background could be changed)

- Functionality

The website functions as expected, with links leading to their correct locations. I found the page simple to navigate, and would assume the same for those within the target demographic.

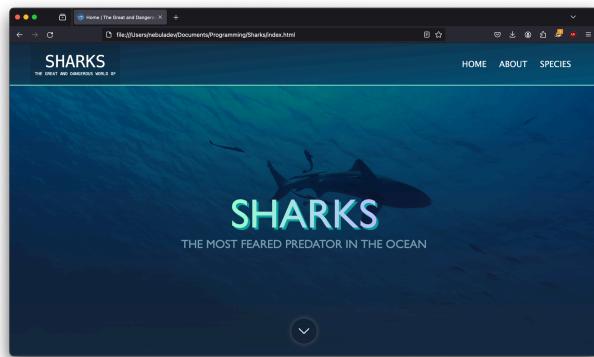

- Accessibility

The accessibility of the page is good, although I would recommend placing the shark species pages in the footer for alternate navigation. Additionally, the 'Home' and 'About' buttons in the navbar have no particular purpose.

- Aesthetics

The website has a good visual design, and implements the likes of the imagemap and other elements stylistically.

macOS:

Windows:

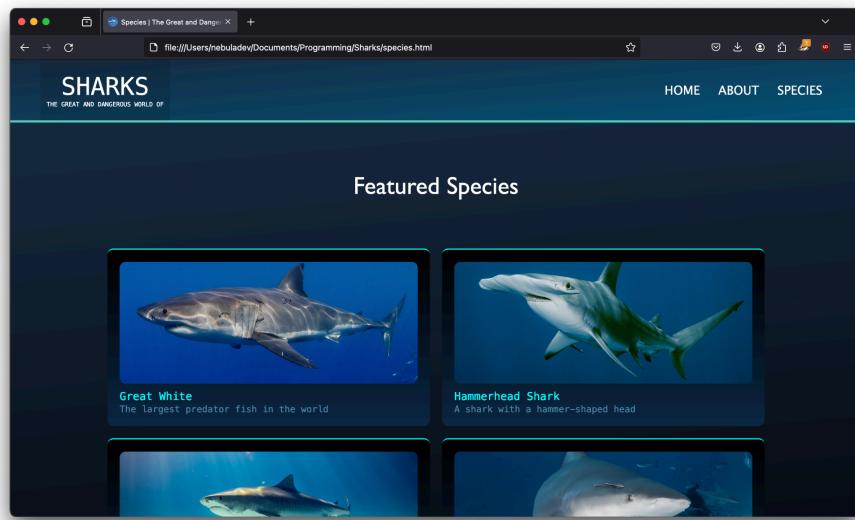

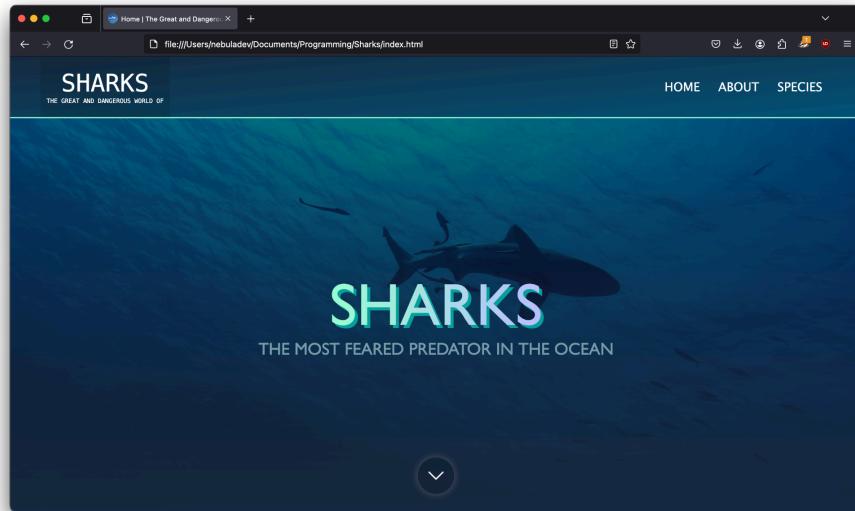

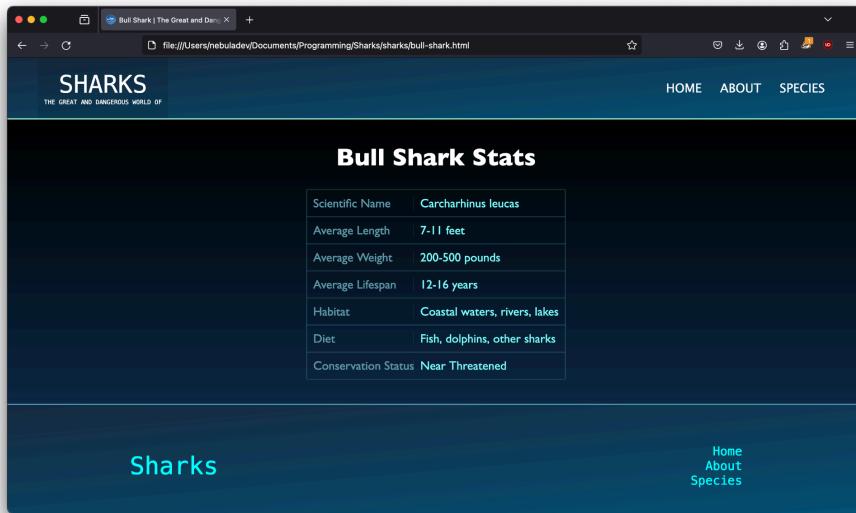

Refer to Task 14 for more details.

## Web Browser Usage

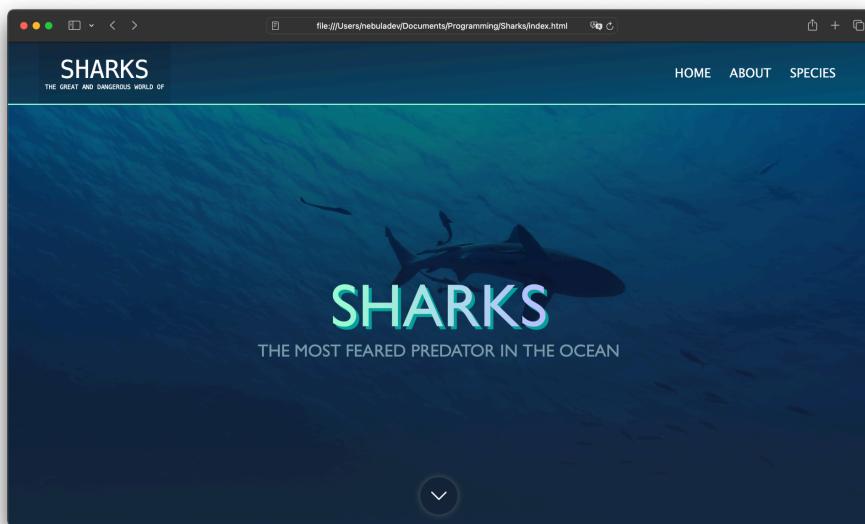

- macOS:

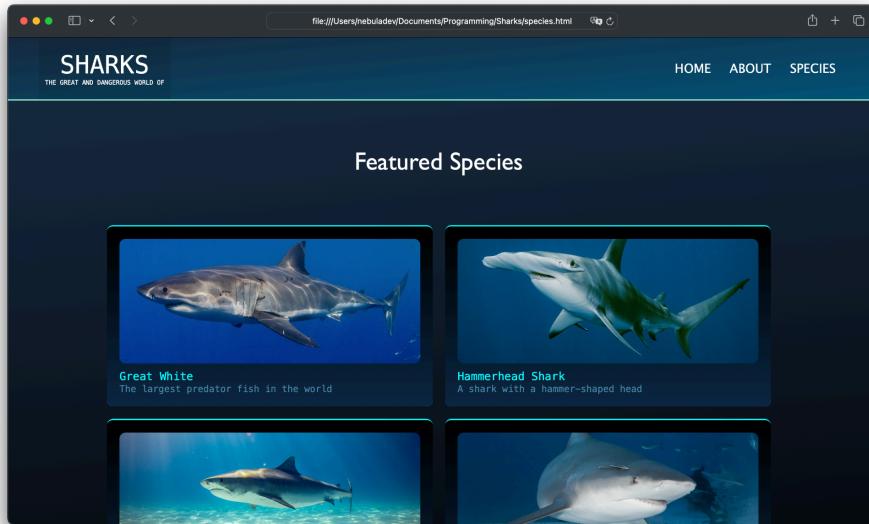

- Firefox 126.0.1

- Safari 17.4.1

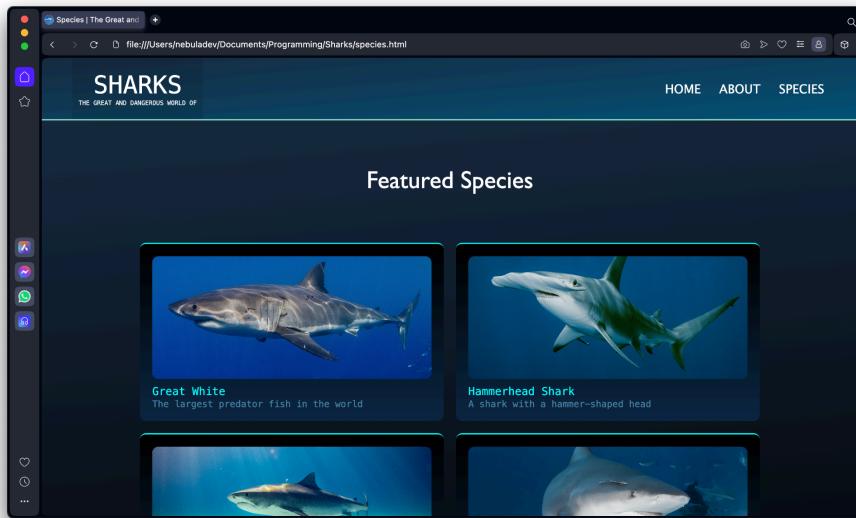

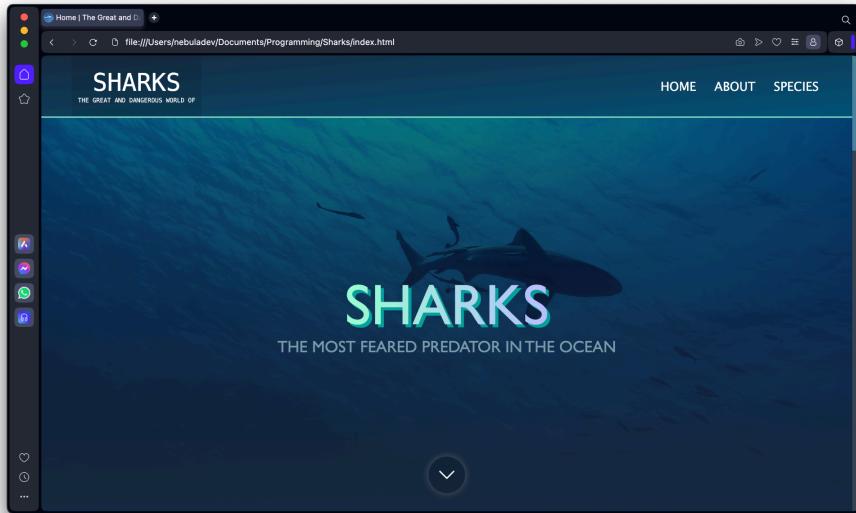

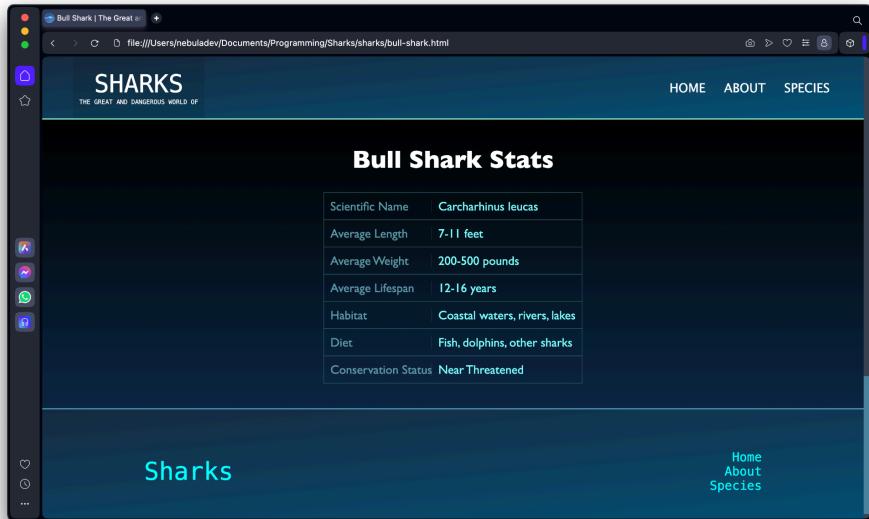

The screenshot shows a dark-themed web page titled "SHARKS" with the subtitle "THE GREAT AND DANGEROUS WORLD OF". A navigation bar at the top includes links for "HOME", "ABOUT", and "SPECIES". Below the header, the title "Bull Shark Stats" is centered. The main content area displays a table of bull shark statistics:

Scientific Name	<i>Carcharhinus leucas</i>
Average Length	7-11 feet
Average Weight	200-500 pounds
Average Lifespan	12-16 years
Habitat	Coastal waters, rivers, lakes
Diet	Fish, dolphins, other sharks
Conservation Status	Near Threatened

At the bottom of the page, there are links for "Sharks", "Home", "About", and "Species".

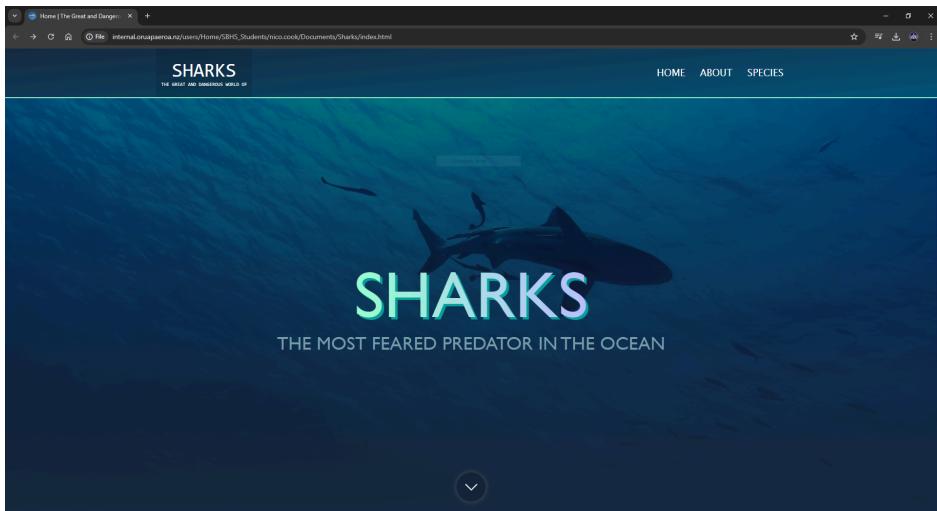

- Opera 110.0.5130.66

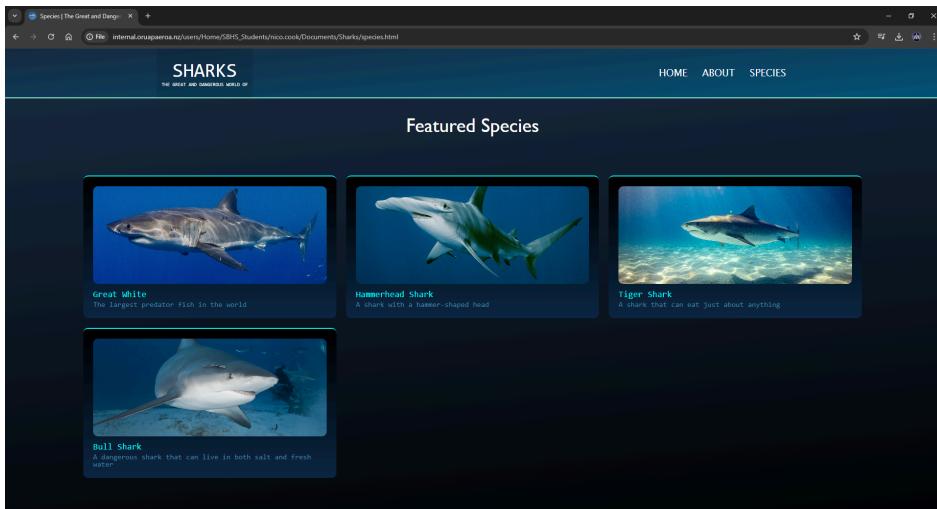

- Windows:

- Chrome 125.0.6422.142

The screenshot shows the "Bull Shark Stats" page with the following information:

feeding, especially in murky waters.
